Business solution

Wi-Fi for hospitals and healthcare

With the aduno® Wi-Fi solution from ituma, you can offer your patients, visitors or employees Internet access with a customised landing page and access via voucher or one-click. In your backend area, you will find comprehensive statistical analysis and convenient monitoring of connected office and end devices.

Wi-Fi plays a key role in the satisfaction of your patients and visitors.

aduno® offers you a stable and secure Wi-Fi solution for an optimal customer experience!

- Promote **special services** directly on the landing page! You can easily make changes to the page yourself at any time.
- Create different landing pages, e.g. for **visitors** and **employees**.
- Offer special customers individual services, such as a **higher download rate** or **longer surfing time!**
- Create your own time-controlled landing pages and special access for **events** or **conferences**.

With aduno®, you can offer your guests a premium service.

A professional aduno® solution offers legal certainty.

Additional functions for your Wi-Fi

Would you like a customised landing page for your Wi-Fi to strengthen your brand image?

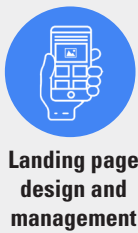

Would you like to create access vouchers for your guests and protect your Wi-Fi from unauthorised access?

Have you always wanted to know when and on which access point the most data is being used?

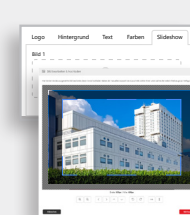

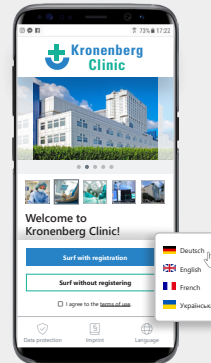

Then the aduno® solution is the right choice for you!

The application is web-based, allowing you to use the portal's functions anytime, anywhere.

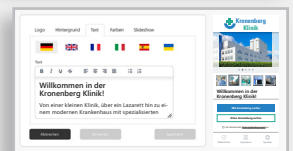

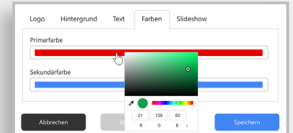

Over 10,000 customer portals have already been implemented in practice. Benefit from regular updates – the aduno solution is continuously being developed!
