IT System Administrator Linux/Unix (m/f/d)
Full-time / indefinite / Location: Hilden

---

ituma GmbH is a successful and financially independent German IT company based in Hilden near Düsseldorf. Since 2010, we have been defining intelligent enterprise solutions in the network as one of the market leaders in Europe. ituma acts as a value-added service provider and software specialist in the areas of network automation, software-defined networking (SDN) and business intelligence. Our employees are experts in their field with an extra portion of IT DNA, who look beyond their technical horizons and realize innovative ideas together.

As experts for sustainable solutions in the network, we have been doing pioneering work for years. Our strategic cooperations with renowned hardware manufacturers enable us to proactively meet short-term changes in the market. For our customers, we always integrate the latest standards and add smart processes to the infrastructure. Our products are data-driven and open-interface platforms that act as a link between the most diverse systems to ensure smooth communication, both automated and human-machine.

The field of activity
"Your playground"

- Team management incl. planning, monitoring and reporting
- Communicating information at management level
- Based on your previous professional experience, you design and implement complex high availability solutions on the basis of Keepalived
- Planning, realization and control of complex IT systems based on existing hardware and new hardware to be integrated
- Monitoring of operating processes and analysis of log files
- Troubleshooting and on-call support for faults that occur
- Technical further development of our cloud services
- Creation and maintenance of documentation
- Ensuring IT security and data protection concepts

Knowledge and skills
"Your toolbox"

- You have a degree in computer science or have completed vocational training as an IT specialist for system integration with at least 5 years of professional experience
- You have a high level of quality awareness and are able to work independently and in a structured manner
- You have good to very good knowledge in the administration of Linux server systems
- You have good knowledge in the areas of virtualization (VM Ware / KVM), firewall configuration, routing
- You are able to read Bash and Python scripts
- You can communicate confidently in written and spoken German and English

What we can offer you

"Your Treasure Chest"
